## WORK EXPERIENCE

### Full Stack Developer – ShipSticks | May 2023 – Jan 2024

- Spearheaded the integration of 'ShipPlay.com', consolidating multiple brands under one platform.
- Led a team of 3, managing tasks and ensuring timely delivery of key features.
- Collaborated cross-functionally with marketing to implement UI/UX improvements.

### Staff Software Engineer – ExecuSource (Home Depot Contract) | June 2022 – May 2023

- Maintained and upgraded Rails APIs with PostgreSQL; aided in transition to Java-based systems.
- Executed ETL queries to support legacy store data migration.
- Worked on-site with clients to align software features with business needs.

### Sr. Ruby on Rails Developer – Creospan Inc. (Mathison Contract) | Dec 2021 – June 2022

- Built microservices using Rails, PostgreSQL, and GraphQL to meet MVP goals.
- Designed wireframes and documentation with Figma, Notion, and Miro.
- Drove platform enhancements in collaboration with the VP of Engineering.

### Full Stack Engineer – BDC HealthIT | Apr 2019 – Dec 2021

- Developed scalable Rails and React applications integrating AWS services.
- Built Python CGI scripts and managed both frontend and backend components.
- Interfaced with clients to translate requirements into actionable tickets.

### Teaching Assistant – LaunchCode | June 2018 – Dec 2018

- Assessed coding assignments and offered tailored feedback to students.

### Brand Specialist & Web Developer – Caribbean Media Group | July 2018 – July 2019

- Consulted directly with clients to define brand goals, website vision, and technical requirements.
- Designed and developed websites using WordPress, Shopify, HTML, CSS, JavaScript, and PHP based on client needs and platform constraints.
- Implemented tailored SEO strategies to improve search rankings and organic traffic for client sites.
- Managed client and in-house social media accounts to boost brand engagement and audience growth.
